

“The Last Ice Age”

Kick-off conference, Oslo November 13

“Røylen”, Norwegian Maritime Museum, Bygdøynesveien 37

Preliminary program – version 2.3.1. (2.11.18)

0930-1000: Registration – coffee/tea

1000-1040:

Presentation of the overall project by the steering committee (David J. Starkey, Ingo Heidbrink, Per G. Norseng)

1045-1115:

“More than a research project”: Ragnhild Hutchison, PhD, on reconstructing the “last ice age landscape” and revitalizing cultural heritage by virtual and augmented reality technologies

1115-1245:

Presentation of 3 PhD projects (15 minutes each + 15 minutes for discussion)

1245-1330:

Lunch

1330-1830

Presentations from the other investigators in the project and invited scholars (15-25 minutes each + questions/discussion) on different topics relevant to the project:

- 1330-1400: Knut M. Nygaard, post doc scholar at the University of South-Eastern Norway, on shipping in the Norwegian ice export
- 1400-1430: Anders Haaland, emeritus senior researcher at the Norwegian Fisheries Museum in Bergen/Museum Vest, on the role of natural ice in the early export of fresh fish from Norway
- 1430-1500: Jan Thomas Kobberrød, professor of history at the University of South-Eastern Norway, on government politics in support of the construction of ice houses in Norwegian fishing harbours
- 1500-1530: Ola Mestad, professor and head of the Scandinavian Institute of Maritime Law at the University of Oslo: “Legal Issues in the Norwegian Ice Cutting Business”
- 1530-1545: Coffee break
- 1545-1615: Paula Schönach, adjunct professor of Environmental Policy/Research Coordinator in the Helsinki Institute of Sustainability Science at the University of

Helsinki, on the supply of ice to the city of Helsinki in the late 19th and early 20th century

- 1615-1645: Inger Johanne Lyngø, dr. art, independent researcher: «Cooking and cooling in Kristiania/Oslo in the Last Ice Age»
- 1645-1715: Finn Erhard Johannessen, professor of history at the University of Oslo, on natural ice and the development of a better infrastructure for the local trade in fresh fish in Kristiania (=Oslo) c. 1900
- 1715-1745: Pål Nymoen, senior researcher in archaeology at the Norwegian Maritime Museum, on a recent archaeological underwater survey of an ice export facility at Frierfjorden, Telemark
- 1745-1815: Pierrick Pourchasse, professor of history at Université de Bretagne Occidentale, on Franco-Norwegian trade connections: "The roe trade from Norway and sardine fishing in Brittany, 18th-19th centuries"
- 1815-1830 Concluding remarks
